Dear

At Mr. Borel's request, I collected the following area classifications for your study.

1. AMS - with which you are fully acquainted.
2. IR Country Code with which you are also acquainted.
3. CODIB Working Group Draft Code. - the development of which you followed when you were with us.
4. 3 digit numeric code - same as CODIB Working Group Code with numeric code in place of alphabetic. This is used in the ADG Experimental Mini operation. Numbers were arbitrarily assigned and therefore hierarchy in Code #3 above has been lost.

It is always good to hear either about you or from you. I hope you are all enjoying California.

Ann departs on her trip on June 6th. I wish I were going again.

Col. and Mrs. Egge visited Washington last month. I had lunch with them and he inquired about you. He was disappointed that you were not in Washington at the time.

I hope this collection of area classifications will be useful to you.

Sincerely

25X1
